SKILLS	Computer: STATA, R, Eviews, Python, GTAP, L ^A T _E X Languages: English, Chinese, Spanish (beginner)
--------	--

VOLUNTEER AND SERVICE	Judge , 35th Annual Mathias Student Research Conference Discussant , Eastern Economic Association 51st Annual Conference Presenter , IMIM Macro International Economic Reading Group	2025 2025 2023 - 2024
-----------------------	---	-----------------------------

SELECTED PAPER ABSTRACTS “The Impact of Trade Invoicing Decisions on Global Value Chain Participation: An Empirical Analysis”

This paper investigates how exchange rate fluctuations influence global value chain (GVC) participation at a disaggregated level, focusing on the role of dominant currency invoicing. Using data from 96 countries (1990-2020), the analysis shows that GVC participation is sensitive to trade invoicing and currency movements. Dollar appreciation dampens GVC participation, particularly backward GVCs, which in turn affects forward linkages over time. However, dominant currency invoicing practice could mitigate part of the adverse effects, highlighting its stabilizing role amid currency fluctuations.

“Are Real Exchange Rate Undervaluation and Trade Integration Complements? An Evaluation on Employment Reallocation”

This paper examines the impact of real exchange rate policy (devaluation of home currency to increase exports) on export growth and sequential export-led growth. It utilizes local projection method to investigate whether real exchange rate policy has a positive effect on reallocating labor to export sectors as economies become more integrated into trade over time and across countries.
